EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lisa V. Mueller on March 14, 2006.

2. In accordance with 37 C.F.R. 1.126, allowed claims 26-27 will be renumbered as claims 1-2, respectively (see MPEP 608.01(j)). Original claim numbers are employed in the amendment below.

Art Unit: 1634

3. The application has been amended as follows:

a) Please amend the claims as follows:

In claim 26, at line 4, delete "epitope of a".

In claim 26, at line 5, delete "and fragments thereof,".

In claim 26, at line 8, after "complexes" insert "as indicative of the presence of said CS198 antigen in the test sample".

In claim 27, line 1, after "antibody" insert "or fragment thereof".

b) Please change the title of the application to:

Methods for detecting CS198 antigen.

c) Please amend the first line of the specification as follows:

The present application is a divisional of U.S. patent application serial no. 09/050,516, filed on March 30, 1998, now U.S. Patent No. 6,627,414, which is a Continuation-In-Part of abandoned U.S. patent application serial no. 08/828,855 filed on March 31, 1997, which are hereby incorporated in their entirety by reference.

Art Unit: 1634

4. The following is an examiner's statement of reasons for allowance:

The closest prior art references, Hillier (GenBank Accession No. AA159525), Lamerdin (GenBank Accession No. AC004030), and Adams (Nature 377[Supp]:3-174), disclose polynucleotides comprising SEQ ID NO: 1, SEQ ID NO: 2, SEQ ID NO: 5, SEQ ID NO: 12, SEQ ID NO: 14, and SEQ ID NO: 25. The prior art does not teach or suggest polypeptides consisting of the particular sequences set forth in the instant claims, and does not teach antibodies/antibody fragments meeting the requirements of the claims. It is also noted that the specification establishes in, e.g., Examples 10 and 14-19, that the methods of the claims are useful in the differentiation of some types of cancerous and non-cancerous tissues.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Substance of the Interview concluding March 14, 2006

5. On March 9, 2006, the examiner contacted applicant's representative Mimi C. Goller and proposed amendments to the claims that would limit them to antibodies of the type exemplified in the detection methods of the specification and place the application in condition for allowance. On March 14, 2006, applicant's representative Lisa V. Mueller contacted the examiner and agreed to the proposed amendments. Accordingly, claims 26-27 are allowed, subject to an examiner's amendment.

Drawings

6. It is noted that the drawings filed on August 22, 2003 are accepted by the examiner.

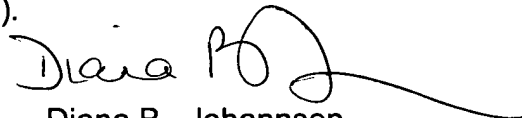

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Diana B. Johannsen whose telephone number is 571/272-0744. The examiner can normally be reached on Monday and Thursday, 7:30 am-4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached at 571/272-0735. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
